Half-Yearly Report

PERFORMANCE

During the first six months of the year the net asset value total return was 10.1% compared to a total return of 2.2% for the FTSE World Europe (ex UK) Index. The share price total return was 10.4%. The discount remained virtually unchanged from the beginning of the six month period. (All figures in sterling terms.)

MARKET REVIEW

Although European equities have advanced somewhat in the first six months of the year, it has, to use a football cliché, very much been a game of two halves. The first quarter continued much as the previous year ended with the market rising, spurred on by renewed optimism surrounding the effects of the two long term refinancing operations ("LTRO") initiated by the European Central Bank ("ECB") in late December 2011 and on the last day of February 2012. The market peaked in March, however, shortly after LTRO2, as investors recognised that, although an injection of liquidity would address some shorter term risks, it would not provide a lasting solution to the Eurozone's problems. After all, the money lent to banks in the LTROs would have to be paid back to the ECB after three years and sovereign debt levels remain very high.

In the second quarter, equities were marched back down the hill, as investors began to fret about forthcoming elections in France and Greece. This was exacerbated by renewed concerns about global economic growth as evidence mounted that the reliable engine of emerging market growth was beginning to slow, off-setting any optimism that growth in America might lift Europe out of the mire. Happily, the period concluded with a welcome rally when the second Greek elections seemed to avoid the worst-case outcome and the latest European "summit" offered some new initiatives just when most observers had given up any hope of progress. During the period, investors continued to pay up for companies perceived to be less sensitive to economic headwinds and therefore more able to sustain, or grow, earnings and dividends. As a consequence, some of the best performing sectors included health care and consumer staples. Companies listed in and exposed to the economies of the "periphery" of Europe continued to struggle and Spanish financials suffered, in particular, in this period.

PORTFOLIO MANAGER'S REPORT

The performance of the Company has been helped, mainly, by some stock-picking successes. Like London buses, stock-picking successes (and failures) tend to come in threes or not at all. Novo-Nordisk, a Danish-based pharmaceutical company, continued to enjoy a strong run on the back of encouraging earnings updates and a growing anticipation about the longer term potential of one of its key drugs, Victoza, in managing diabetes and, if approved, obesity. Clothing retailer, Hugo Boss, rallied during the period as it delivered strong sales growth in all regions as a result of recent initiatives to improve its offer to customers. The company's large holding in Hugo Boss ordinary shares, which for liquidity reasons were trading at a 15% discount to the preference shares, was boosted further when the company announced that it planned to convert all preference shares into ordinary shares, thereby increasing the liquidity of the ordinary shares and closing the discount. Schibsted, a leading on-line classified advertiser and newspaper company, also delivered handsome returns as investors grew increasingly positive about the prospects for their on-line businesses following a very convincing Capital Markets Day presentation. As always, there were some detractors: Storebrand, the Scandinavian life insurer, disappointed the market by not paying a dividend for 2011 ahead of regulatory negotiations and KPN performed poorly over the period in anticipation of increased competition in the Dutch mobile telecommunications market and despite Carlos Slim's announcement of his plans to buy a large stake.

DISCOUNT MANAGEMENT

The Board continues to adopt an active discount management policy.

During the six months to 30 June 2012, 1,090,853 ordinary shares were repurchased for cancellation. The purpose has been to control the level of discount and reduce share price volatility in the interests of shareholders. The discount at 30 June 2012 was 14.2%, virtually the same level as at the start of the period. Share repurchases at a discount also result in an enhancement of the NAV per share, which over the six month period amounted to 6.19 pence per share. Since the reporting period end, there have been no further ordinary shares repurchased for cancellation.

GEARING

The Company continues to gear through the use of long Contracts For Difference ("CFDs"). As at 30 June 2012 the total portfolio exposure was £585.3m representing 107.4% of shareholders' funds.

PRINCIPAL RISKS AND UNCERTAINTIES

The Board, with the assistance of the Manager, has developed a risk matrix which, as part of the internal controls process, identifies the key risks that the Company faces. The Board believes that the principal risks and uncertainties faced by the Company continue to fall into the following categories: market risks (including possible impacts of the Eurozone crisis); performance risk; income risks – dividends; share price, NAV and discount volatility risk; gearing risk; counterparty risk; and control systems, regulation, governance including shareholder relations risks. Information on each of these is given in the Business Review section of the Annual Report for the year ended 31 December 2011.

GOING CONCERN

The Board receives regular reports from the Manager and the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the financial statements as outlined in the Annual Report for the year ended 31 December 2011. The next continuation vote will be put to shareholders at the Annual General Meeting in 2013.

OUTLOOK

Confidence is low and companies remain cautious. Confidence is, in many ways, the key to growth. If, for instance, company management were to become more optimistic then they would start to invest in labour and in capital projects which would boost economic growth. Confidence is lacking, however, because there is, of course, plenty to be fearful about: the European sovereign debt crisis, the fiscal "cliff" in the US, the emerging markets' slow-down. Likewise, investors are cautious and sentiment is depressed. Low expectations are, however, reflected in attractive valuations. The Manager continues to favour attractively valued companies, with sound balance sheets, which can deliver consistent dividend growth. These sorts of companies have become more fashionable in the current stop/start environment and they are often accused, by equity market participants, of being "relatively" expensive. Time will tell but, for the Manager, many of these companies remain attractively valued in absolute terms, with dividend yields in excess of government bond yields and growing dividends.

By order of the Board FIL Investments International 24 July 2012

Directors' Responsibility Statement

The Directors confirm to the best of their knowledge that:

- a) the condensed set of financial statements contained within the Half-Yearly financial report has been prepared in accordance with the UK Accounting Standards Board's Statement 'Half-Yearly Financial Reports';
- b) the Half-Yearly Report narrative on pages 3 to 5 (constituting the interim management report) includes a fair review of the information required by Rule 4.2.7R of the FSA's Disclosure and Transparency Rules and their impact on the condensed set of financial statements and a description of the principal risks and uncertainties and going concern for the remaining six months of the financial year; and
- c) in accordance with Disclosure and Transparency Rule 4.2.8R there have been no related parties transactions during the six months to 30 June 2012 and therefore nothing to report on any material effect by such a transaction on the financial position or the performance of the Company during that period; and there have been no changes in this position since the last Annual Report that could have a material effect on the financial position or performance of the Company in the first six months of the current financial year.

The Half-Yearly financial report has not been audited or reviewed by the Company's Independent Auditor.

The Half-Yearly financial report was approved by the Board on 24 July 2012 and the above responsibility statement was signed on its behalf by Humphrey van der Klugt, Chairman.

A Statement of Total Recognised Gains and Losses has not been prepared as there are no gains and losses other than those reported in this Income Statement.

The total column of the Income Statement is the profit and loss account of the Company.

All revenue and capital items in the above statement derive from continuing operations.

No operations were acquired or discontinued in the period.

These financial statements have been prepared in accordance with the Association of Investment Companies Statement of Recommended Practice issued in January 2009.

	Shares	£'000	Shares	£'000	Shares	£'000
Issued, allotted and fully paid:						
Ordinary shares of 25 pence each						
Beginning of the period	44,294,946	11,073	49,449,986	12,362	49,449,986	12,362
Repurchase of ordinary shares	(1,090,853)	(272)	(5,155,040)	(1,289)	(1,531,587)	(383)
End of the period	43,204,093	10,801	44,294,946	11,073	47,918,399	11,979

7 NET ASSET VALUE PER ORDINARY SHARE

The net asset value per ordinary share is based on net assets of £544,860,000 (31.12.11: £517,617,000; 30.06.11: £700,557,000) and on 43,204,093 (31.12.11: 44,294,946; 30.06.11: 47,918,399) ordinary shares, being the number of ordinary shares in issue at the period end.

8 INVESTMENT TRANSACTION COSTS

Transaction costs are incurred in the acquisition and disposal of investments. These are included in the gains/(losses) on investments designated at fair value through profit or loss in the capital column of the Income Statement and are summarised below:

	30.06.12 unaudited £'000	31.12.11 audited £'000	30.06.11 unaudited £'000
Purchases	93	440	302
Sales	51	318	233
<u>-</u>			
	144	758	535

9 UNAUDITED FINANCIAL STATEMENTS

The results for the six months to 30 June 2012 and 30 June 2011, which are unaudited, constitute non-statutory accounts within the meaning of Section 435 of the Companies Act 2006. The figures and financial information for the year ended 31 December 2011 are extracted from the latest published financial statements. These financial statements, on which the Independent Auditor gave an unqualified report, have been delivered to the Registrar of Companies.

Investor Information

Glossary of Terms

BENCHMARK

FTSE World Europe (ex UK) Index against which the performance of the Company is measured

CONTRACT FOR DIFFERENCE (CFD)

A Contract For Difference is a derivative. It is a contract between an investor and an investment house at the end of which the parties exchange the difference between the opening price and the closing price of the underlying asset of the specified financial instrument. It does not involve the investor buying or selling the underlying asset, only agreeing to receive or pay the movement in its share price. A Contract For Difference allows the investor to gain access to the movement in the share price by depositing a small amount of cash known as margin. The investor may reason that the asset price will rise, by buying ("long" position) or fall, by selling ("short" position). If the investor trades long, dividends are received and interest is paid. If the investor trades short, dividends are paid and interest is received. The Company only uses long Contracts For Difference

DERIVATIVES

Financial instruments (such as futures, options and Contracts For Difference) whose value is derived from the value of an underlying asset

DISCOUNT

If the share price of the Company is lower than the net asset value per share, the Company's shares are said to be trading at a discount. The discount is shown as a percentage of the net asset value. The opposite of a discount is a premium. It is more common for an investment trust's shares to trade at a discount than a premium

FAIR VALUE

The fair value is the best estimate of the value of the investments, including derivatives, at a point in time and this is measured as:

- Listed investments valued at bid prices, or last prices, where available, otherwise at published price quotations
- Unlisted investments valued using an appropriate valuation technique in the absence of an active market
- Contracts For Difference are valued as the difference between the settlement price of the contract and the value of the underlying shares in the contract (unrealised gains or losses)

GEARING OR GEARING EXPOSURE

Gearing or gearing exposure describes the level of a Company's leverage and is usually expressed as a percentage. It can be through the use of bank loans, bank overdrafts or Contracts For Difference in order to increase a Company's exposure to stocks. Leverage is permitted in order to buy or gain exposure to further investments. If assets rise in value, gearing magnifies the return to ordinary shareholders. Correspondingly, if the assets fall in value, gearing magnifies the fall. The gearing percentage reflects the amount of leverage the Company uses to invest in the market. Contracts For Difference are used as a way of gaining exposure to the price movements of shares without buying the underlying shares directly

NET ASSET VALUE (NAV)

Net asset value is sometimes also described as "shareholders' funds", and represents the total value of the Company's assets less the total value of its liabilities. For valuation purposes it is common to express the net asset value on a per share basis

PREMIUM

If the share price of the Company is higher than the net asset value per share, the Company's shares are said to be trading at a premium. The premium is shown as a percentage of the net asset value. The opposite of a premium is a discount

RETURN

The return generated in the period from the investments:

- **Income Return** reflects the dividends and interest from investments and other income net of expenses, finance costs and taxation
- Capital Return reflects the return on capital, excluding any income returns
- Total Return reflects the aggregate of capital and income returns in the period

SHAREHOLDERS' FUNDS

Shareholders' funds are also described as "net asset value" and represent the total value of the Company's assets less the total value of its liabilities

TOTAL PORTFOLIO EXPOSURE

The total of fixed asset investments at fair value plus the fair value of the underlying securities within the Contracts For Difference

TOTAL RETURN PERFORMANCE

The return on the share price or net asset value per share taking into account the rise and fall of share prices and the dividends paid to shareholders. Any dividends received by the shareholder are assumed to have been reinvested in additional shares (for share price total return) or the Company's assets (for net asset value total return)

Warning to Shareholders

SHARE FRAUD WARNING

Share fraud includes scams where investors are called out of the blue and offered shares that often turn out to be worthless or non-existent, or an inflated price for shares they own. These calls come from fraudsters operating in 'boiler rooms' that are mostly based abroad.

While high profits are promised, those who buy or sell shares in this way usually lose their money.

The Financial Services Authority (FSA) has found most share fraud victims are experienced investors who lose an average of £20,000, with around £200m lost in the UK each year.

PROTECT YOURSELF

If you are offered unsolicited investment advice, discounted shares, a premium price for shares you own, or free company or research reports, you should take these steps before handing over any money:

- 1. Get the name of the person and organisation contacting you.
- 2. Check the FSA Register at www.fsa.gov.uk/fsaregister to ensure they are authorised.
- 3. Use the details on the FSA Register to contact the firm.
- 4. Call the FSA Consumer Helpline on **0845 606 1234** if there are no contact details on the Register or you are told they are out of date.
- 5. Search our list of unauthorised firms and individuals to avoid doing business with.
- 6. REMEMBER: if it sounds too good to be true, it probably is!

If you use an unauthorised firm to buy or sell shares or other investments, you will not have access to the Financial Ombudsman Service or Financial Services Compensation Scheme (FSCS) if things go wrong.

REPORT A SCAM

If you are approached about a share scam you should tell the FSA using the share fraud reporting form at **www.fsa.gov.uk/scams**, where you can find out about the latest investment scams. You can also call the Consumer Helpline on **0845 606 1234**.

If you have already paid money to share fraudsters you should contact Action Fraud on 0300 123 2040

FURTHER INFORMATION

The Fidelity Individual Savings Account ("ISA") is offered and managed by Financial Administration Services Limited. The Fidelity Investment Trust Share Plan is managed by FIL Investments International. Both companies are authorised and regulated by the Financial Services Authority. The Fidelity Investment Trust Share Plan is administered by The Bank of New York Mellon and shares will be held in the name of The Bank of New York Nominees Limited.

The value of savings and eligibility to invest in an ISA will depend on individual circumstances and all tax rules may change in the future. Fidelity investment trusts are managed by FIL Investments International. Fidelity only gives information about its own products and services and does not provide investment advice based on individual circumstances. Should you wish to seek advice, please contact a Financial Adviser.

Issued by Fidelity European Values PLC.

Please note that the value of investments and the income from them may fall as well as rise and the investor may not get back the amount originally invested. Past performance is not a guide to future returns. For funds that invest in overseas markets, changes in currency exchange rates may affect the value of your investment. Investing in small and emerging markets can be more volatile than other more developed markets.

Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only. Investees should also note that the views expressed may no longer be current and may have already been acted upon by Fidelity.
