

Health, Safety and Environment

North American Construction Group has an uncompromising commitment to health and safety. We continuously strive to improve safety performance through ongoing training, competency testing, evaluation and the use of management tools and techniques. Highlights of the NACG safety program include:

- » Executive Management Support
- » Structured HSMS to CSA Z1000 Model
- » Drug and Alcohol Program that exceeds COAA 2006
- » Management involvement with safety leadership evaluations from foreman to Operations Manager
- » Continuous QA/QC of Safety System – 100% review of FLRA/inspections/investigations
- » Continuous fleet monitoring – speed, behavior, location specific and use

By facilitating a healthy work environment, we improve our productivity and ensure: **"Everyone Gets Home Safe".**

**EVERYONE
GETS
HOME SAFE**

Integrated Approach

North American Construction Group Inc. (NACG) is Canada's premier provider of heavy construction, mining, tailings & environmental, piling, pipeline and industrial services. By leveraging the expertise from all of our operating divisions, NACG is able to provide a full-spectrum of services from consultation to completion.

NACG's 50 years of experience enables us to advise on project feasibility, budgeting and scheduling with the utmost accuracy. We have systems and controls in place to guarantee cost effective project development and skillful execution. Our familiarity with large projects in northern climates gives us a significant advantage over our competitors.

NACG's diverse fleet of heavy equipment and support vehicles is the largest in Canada, giving us the ability to offer the most efficient blend of equipment for each project.

We focus on people and relationships. Positive interactions, collaboration, safety and satisfaction for all stakeholders are integral to the success of any NACG project.

Comprehensive Design Build Services

Our Industrial division has extensive project management and design-build construction experience that has been tested and proven on some of the largest construction projects in Canada. By getting involved early in the process, we are able to share our expertise and assist clients in defining project scope and timeline, reducing risk and ensuring efficient use of time and money. NACG will work with a variety of contract strategies depending on the level of scope definition.

Our services include the following:

- » Site development
- » Civil earthworks
- » Installation of underground utilities and piping
- » Infrastructure construction
- » Mechanically stabilized earth walls (MSE)
- » Constructability analysis
- » Work package determination
- » Specification consultation
- » Construction management, including project planning and scheduling
- » Execution plan development

First Nations Partnerships

NACG has a long history of working and partnering with First Nation communities across Canada. NACG is committed to developing early involvement and meaningful participation with First Nation groups and to being a positive participant in the communities we work in. NACG's approach is to work collaboratively with project owners and First Nation corporations and communities in order to develop a "best-fit" approach to a partnership agreement.

Key Industrial Projects:

- » Syncrude, Aurora Base Plant and Mine Services
- » Syncrude, Aurora Train Alliance (Phase I and II)
- » Syncrude, Upgrader Expansion #1
- » Suncor, Millenium Naphtha Unit
- » Suncor, Voyageur
- » Suncor, Steep Bank
- » CNRL, Horizon Plant Site Development
- » Korean National Oil Company, Black Gold SAGD Project
- » Consumer's Cooperative Refinery Ltd. , Regina
- » Nova Chemicals, Fire Water Line Upgrade Project
- » Albian Aerodrome Project
