

The India Fund, Inc.

April 2014 Performance Data and Portfolio Composition

Investment Objective and Policies

The Fund's investment objective is long-term capital appreciation, which it seeks to achieve by investing primarily in the equity securities of Indian companies.

Performance

The latest available performance figures have been calculated net-of-fees in U.S. dollars for the period to April 30, 2014.

Total Returns* (%)

	Cumulative as of April 30, 2014			Annualized as of April 30, 2014				
	1 Mo	3 Mo	YTD	1 Yr	3 Yrs	5 Yrs	10 Yrs	Since Inception 02/23/94
NAV	-2.8	13.4	8.3	5.1	-3.2	11.8	12.0	8.9
Market Price	-4.7	14.6	9.8	6.4	-5.3	7.8	10.8	7.9
MSCI India	-1.1	11.2	7.0	1.3	-4.6	11.1	12.0	6.6

*Past performance is no guarantee of future results. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than original cost. Current performance may be lower or higher than the performance quoted. All return data includes investment management fees, administrative and custodial charges, and assumes the reinvestment of all distributions. Returns for periods less than one year are not annualized.

The India Fund, Inc.

Fund Manager's Report

- Indian equities posted broadly flat returns in April, following the previous month's strong performance. However, momentum remained in some sectors, with cyclical stocks in particular continuing their rebound.
- Data pointed to a persistently subdued economy; the trade deficit widened and inflation crept up compared to the previous month, while fears grew that the coming monsoon season would be drier than average.
- In a move to enhance competition in the country's state-dominated financial sector, India's central bank issued two new private sector banking licenses.
- In Fund-related news, Infosys increased its dividend payout with its full-year results as cost-cutting efforts offset pressure on earnings. Meanwhile, the IT services provider maintained its conservative sales outlook and will implement a succession plan as part of ongoing restructuring.
- Holcim and Lafarge will merge to create a US\$60 billion global cement behemoth. The Fund's holdings in two Holcim group companies, ACC and Ambuja, most likely would integrate with Lafarge to become India's largest cement producer. We like the economies of scale, supply consolidation and pricing power that the merger could bring, as well as the opportunities that could potentially be created for our other cement holdings.
- In April, we participated in Tata Power's rights issue, increasing the holding at what we viewed as an attractive discount. We believe that the company may strengthen its balance sheet and fund ongoing expansion, given its healthy growth profile and project pipeline.

Important Risk Disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the Fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the Fund's portfolio. The net asset value (NAV) is the value of an entity's assets less the value of its liabilities. The market price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

The information presented was prepared and issued by the Fund based on publicly available information, internally developed data, and other sources believed to be reliable. All reasonable care has been taken to ensure accuracy.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Concentrating investments in the India region subjects the Fund to more volatility and greater risk of loss than geographically diverse funds. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies.

Important Information

Under U.S. tax rules applicable to the Fund, the amount and character of distributable income for each fiscal year can be finally determined only as of the end of the Fund's fiscal year. The Fund anticipates that sources of distributions to shareholders may include net investment income, net realized short-term capital gains, net realized long-term capital gains and return of capital. The estimated composition of the distributions may vary from time to time because the estimated composition may be impacted by future income, expenses and realized gains and losses on securities. For more detailed information related to the composition of the Fund's distributions, see www.aberdeenIFN.com.

Aberdeen Asset Management Inc. has prepared this report based on information sources believed to be accurate and reliable. All reasonable care has been taken to ensure accuracy. However, the figures are unaudited and neither the Fund, Aberdeen Asset Management Asia Limited (the Investment Manager), nor any other person guarantees their accuracy. Investors should seek their own professional advice and should consider the investment objectives, risks, charges and expenses before acting on this information.

The MSCI India Index is designed to measure the performance of the large and mid cap segments of the Indian market. With 73 constituents, the index covers approximately 85% of the Indian equity universe. Indexes are unmanaged and have been provided for comparison purposes only. No fees or expenses are reflected. You cannot invest directly in an index.

Past performance does not guarantee future results.
