Grain Market Dynamics in China

INDUSTRY HIGHLIGHTS

- Emerging technologies benefit Chinese farmers
- Minister Han stresses spring planting at national video conference
- China urges more international cooperation in agriculture
- Vice Minister Zhang prioritizes three major projects in agricultural sci-tech

In China, contributions of science and technology to agricultural growth increased to 54.5% in 2012, according to Chen Chuanhong, an official in charge of rural affairs under the Ministry of Science and Technology in China. As rapid urbanization and industrialization squeezes farmland, technology breakthroughs are deemed as a way out to protect farmers' income and feed the country's population.

For ten years in a row, the Chinese government has issued its first annual policy documents targeting rural problems. In the recent two years, it underlined the importance of technology in boosting rural development in particular. In 2012, the first policy document focused on speeding up technological innovation. This year, it highlighted developing modern agriculture to strengthen the vitality of rural areas.

The National Video Conference on Spring Planting was held by Chinese Ministry Of Agriculture on February 17, 2013. Minister Han Changfu said that the country will put forth every effort to ensure spring planting and a good harvest in summer.

A spring drought is likely to impact most of the country due to a lack of rainfall and fast temperature increases, according to weather authorities. Minister Han urged agricultural departments at all levels to increase subsidies for farmers and work to reduce losses from unfavorable factors that may affect grain output like weather-related disasters.

The governing council of the UN's International Fund for Agricultural Development has held a two-day meeting in Rome to discuss poverty reduction and food security for rural communities. Chinese Vice Premier Hui Liangyu attended the meeting.

The Vice Premier said joint efforts were needed by the international community to ensure adequate food supplies and to reduce poverty. Hui also attended a meeting with delegations from Cyprus, Greece, Italy, Malta, Portugal and Spain. He urged them to expand agricultural investment and become partners to benefit people in each country.
